PROFILE

Software engineering student specializing in Back-end Development, passionate about software architecture and aspiring to become a Cloud Architect. Solid expertise in UML, Merise, design patterns, and cloud computing fundamentals. Eager to have a great Impact in world organizations

EDUCATION

Bachelor of Engineering in software Engineering(GL)	October 2024 – July 2027 (Expected)
<i>Ecole Nationale Supérieure Polytechnique de Douala – University of Douala</i>	<i>Douala, Cameroon</i>
Technology Degree (Licence Technologique)	July 2024
<i>Institut Universitaire de Ngaoundéré – University of Ngaoundere</i>	<i>Ngaoundere, Cameroon</i>

TECHNICAL SKILLS

Languages & Frameworks: Python, Java, JavaScript, TypeScript, Django REST Framework (DRF), Flask, Spring Boot, Vue.js, Angular, Tailwind CSS

Architecture & Engineering: RESTful APIs, Micro-services, Monolithic Architecture, UML Design

Databases & DevOps: PostgreSQL, Docker, Git, GitHub, Render Deployment

Cloud & Certifications: IBM Cloud Computing Fundamentals, interest in cloud architecture

PROFESSIONAL EXPERIENCES

ASECNA – Web Application Internship	August 4 – September 10, 2025
<i>Garoua, Cameroon</i>	<i>Full-Stack Developer Intern</i>

- ✦ Digitalized the management and tracking of daily operations logs (PVs) by designing and delivering a full-stack web application, reducing manual reporting effort.
- ✦ Containerized the application using Docker, ensuring reliable and portable deployment across environments.

CENADI – Network Security Internship	April 22 – July 1, 2024
<i>Yaoundé, Cameroon</i>	<i>IT Network & Risk Management Intern</i>

- ✦ Assessed and mapped network infrastructure risks in a server room environment, producing a structured risk matrix using **EBIOS-RM** to support IT governance decisions.

SODECOTON – Web Application Internship	March 20 – May 26, 2023
<i>Garoua, Cameroon</i>	<i>Backend Developer Intern</i>

- ✦ Designed and delivered a web application to monitor and manage electricity consumption of generator groups, enabling data-driven operational decisions.

PROJECTS

TrustTrade – E-Commerce Platform (Back-end Developer)	January 2026 – Present
<i>Douala, Cameroon</i>	<i>Spring Boot Micro-services</i>

- ✦ Building a scalable microservices-based e-commerce back-end with Spring Boot, focusing on business process decoupling and secure API design.

LANGUAGES

--**French:** Native --**English:** Intermediate (B1-B2) --**Japanese:** Beginner

CERTIFICATIONS, INTERESTS AND SOFT SKILLS

-- **IBM** – Cloud Computing Fundamentals | **Simplilearn** – Python Django 101 | **Anthropic** – Claude 101

INTERESTS AND SOFT SKILLS

Reading, Anime/Manga, Tech Culture, Sport | Microsoft Office Suite proficiency | Problem-solving, Analytical thinking, Teamwork, Adaptability | Prompt Engineering.
